

Marine Digital Connectivity Essentials

Master Your Vessel's Digital Ecosystem

Reliable internet at sea is no longer optional — it is the backbone of modern yachting. From seamless communication and remote work to guest entertainment and operational safety, your vessel's connectivity defines the quality of every journey.

At **Electronaval**, we empower yacht owners, captains, and crew to take full control of their digital infrastructure. With technologies like **Starlink Maritime**, **4G/5G**, and advanced onboard networks evolving rapidly, understanding how to manage them is essential.

A Premium 50-Hour Online Training Program

Delivered live via Zoom, *Marine Digital Connectivity Essentials* transforms complex technology into practical, everyday skills you can apply immediately on board.

What You Will Gain

- ✓ **Digital Autonomy.** Confidently manage Starlink, 4G/5G routers, onboard networks, and connectivity settings without relying on external support.
- ✓ **Smart Troubleshooting.** Identify and resolve common connectivity issues quickly — keeping your vessel online and your operations uninterrupted.
- ✓ **Network Efficiency.** Optimize bandwidth, prioritize critical devices, and ensure smooth internet access for all passengers.
- ✓ **Cost Control.** Learn the essential strategies to avoid unnecessary roaming charges and manage data consumption intelligently.

Why This Program Stands Out

This is not a technical seminar for IT professionals. It is a **hands-on, real-world training experience** designed specifically for the maritime environment — practical, accessible, and immediately useful.

Through live demonstrations, guided exercises, and real onboard scenarios, you will turn theory into confident action.

Program Modules

- **The Digital Map of the Vessel** Understand every component of your onboard connectivity ecosystem.
- **Satellite Connectivity – Starlink Maritime** Setup, optimization, safety, and performance tuning.
- **Mobile Networks & Roaming** Smart use of 4G/5G, SIM management, and cost-saving strategies.
- **WiFi & User Experience** Designing a stable, secure, and guest-friendly onboard network.
- **Troubleshooting Workshop** Real cases, live problem-solving, and practical checklists.

Take Control of Your Digital Life at Sea

Upgrade your onboard experience and navigate with confidence. With Electronaval, you don't just learn technology — you master it.
